This report presents the Wisconsin Youth Tobacco Survey (WYTS) 2002 data for public middle school youth in grades 6, 7, and 8. The data are shown in table format, by question, response options, and answers.

At this time, the Division of Public Health does not anticipate any further reports regarding the WYTS 2002.

Purpose

The Wisconsin Youth Tobacco Survey (WYTS) is a comprehensive measure of youth awareness, attitudes and related behaviors about tobacco use in Wisconsin. The purpose of this survey is to monitor trends of these attitudes and behaviors to assist in improving youth programs and initiatives.

Background

The YTS questionnaire was developed based on a collaborative effort using the expertise of the American Legacy Foundation, the Office of Smoking and Health (OSH), Centers for Disease Control and Prevention (CDC), representatives of state health agencies and national experts.

The YTS was first adapted for use and administered in Wisconsin during the spring semester of the 1999-2000 academic year to a random sample of public middle and high school students. The survey has been continued on an annual basis for public middle school youth and a biennial basis for public high school youth. The survey is administered during the spring semester of each academic year.

The WYTS provides a comprehensive data set and the ability to make valid statewide estimates about tobacco use awareness, attitudes and behaviors among the Wisconsin's public middle and high school student population.

Methods

The Department of Health and Family Services (DHFS), Department of Public Instruction (DPI), and school districts and public middle and high schools across Wisconsin cooperated in the survey administration.

DHFS contracted with the University of Wisconsin-Madison, Department of Population Health Sciences and the University of Wisconsin Survey Center to administer the WYTS during the months of March, April, and May 2002 in 50 randomly chosen schools.

Public schools containing the grades 6, 7, and 8 (for middle schools) were included in the potential survey sample. A random sample was chosen by standard scientific methods from all eligible public schools. All students in the selected classes were eligible to participate in the survey.

Thirty-six of 48 (75%) randomly selected middle schools agreed to participate in the 2002 Wisconsin Youth Tobacco Survey. In the participating schools, 1,298 of the 1,558 sampled students (83%) completed usable questionnaires. This gave an overall response rate of 62% for all potentially eligible students in the original 48 eligible schools.

$$\text{Response Rate of Schools (75\%)} * \text{Response Rate of Students (83\%)} = \\ \text{Overall Response Rate (62\%)}$$

(Out of the 50 randomly chosen schools, two were determined to be ineligible and were not included in the response rate calculation.)

The data are presented in a table format by question. The questions are listed in the order as they appeared on the survey.

The “missing” variable under the response options is for those youth who completed the survey, but for whatever reason, did not answer that particular question. The “unweighted frequency” is the number of students who answered that particular response to that specific question. This is sometimes referred to as the “raw” number. The numbers in this column should always add up to 1,298 (the number of participants) for each question. The “weighted frequency” statistically adjusts the “unweighted frequency” using several variables including, but not limited to, grade and gender, to reduce bias in the sample and make the data more representative of all public middle school youth in Wisconsin. This is shown as a percent of all public middle school youth in Wisconsin, not just the youth that participated in the survey.

Funding

The 2002 WYTS was funded by the Department of Health and Family Services’ Thomas T. Melvin Youth Tobacco Prevention and Education Program using funds provided by the Wisconsin Tobacco Control Board.

Disclaimer

This report contains only on data from WYTS 2002. As such, it has potentially strong limitations in regards to tracking of trends in perceptions, attitudes and behaviors by middle school grade youth that may be of importance in understanding why some smoke and how best to devise strategies to prevent and/or reduce use.

Nevertheless, the data should help provide an understanding of the influences toward smoking behavior and attitudes on smoking in the middle school years.

The data will also be used in conjunction with other local and national data that explore similar topics.

The Wisconsin Tobacco Control Program

The Wisconsin Tobacco Control Program, located within the DHFS (Bureau of Chronic Disease Prevention and Health Promotion, Division of Public Health), is committed to reducing tobacco usage in Wisconsin. The Program, in collaboration with Wisconsin local health departments and other community organizations active in tobacco control, works towards the following goals:

- ❖ **Eliminate Exposure to Environmental Tobacco Smoke**
- ❖ **Reduce Smoking Initiation among Youth**
- ❖ **Promote Quitting among Adults and Young People**
- ❖ **Identify and Eliminate Health Disparities Among Population Groups**

For more information or additional copies of this report write to:

Acknowledgements

Many dedicated persons contributed to the 2002 WYTS survey. We especially wish to thank all the participating students, teachers and principals, as well as the following organizations and entities:

- The University of Wisconsin-Madison Department of Population Health Sciences
- The Wisconsin Department of Public Instruction
- Tobacco control and prevention advocates
- Community coalitions

Wisconsin 2002 Youth Tobacco Survey (YTS) MIDDLE SCHOOL FACT SHEET

The Wisconsin YTS is a comprehensive measure of youth awareness, attitudes, and related behaviors about tobacco use. The purpose of this survey is to monitor trends of these attitudes and behaviors to assist in improving youth programs and initiatives.

The Wisconsin YTS is a school-based survey of students in grades 6-8, conducted in the spring semester of each academic year beginning in 1999-2000. There were 50 schools randomly selected in 2002 to participate in this survey. Classrooms were also randomly selected and all students in selected classes were eligible to participate. The 2002 YTS middle school response rate was 75%, the student response rate was 83%, and the overall response rate was 62%. A total of 1,298 public middle school students participated in the Wisconsin YTS in 2002.

Prevalence

- 42% of students have ever used any tobacco product (6th grade=37%, 7th grade=39%, 8th grade=50%)
- 34% have ever smoked cigarettes (6th grade=28%, 7th grade=32%, 8th grade=43%)
- 13% currently use any tobacco product (Male=15%, Female=12%)
- 8.7% currently smoke cigarettes (6th grade=5%, 7th grade=7%, 8th grade=14%)

Environmental Tobacco Smoke (ETS)

- 47% live with someone who smokes cigarettes
- 58% are in the same room as others who smoke during the week
- 93% think that smoke from other people's cigarettes is harmful to them

Cessation – Current Smokers

- 58% want to stop smoking
- 62% attempted to quit smoking during the past 12 months

Media

- 83% have seen or heard commercials about the dangers of cigarette smoking
- 61% have seen or heard anti-smoking ads that say "B-FREE" from tobacco

School

- 75% were taught in class about the dangers of tobacco use
- 2.6% smoked on school property in the past month

Community

- 16% participated in a community event to discourage tobacco use

Access and Availability – Current Smoker < 18 years old

- 7.3% buy cigarettes in a store

Middle School Highlights

- The current smoking rate has decreased for the third year in a row.
- 42% have ever used tobacco in any form.
- 34% of public middle school students have ever tried smoking cigarettes.
- ETS exposure is high – almost 5 in 10 students were in the same room with smokers during the past week.
- Over half of current smokers want to stop smoking.
- More than 8 out of 10 students say anti-smoking media messages in the past month.
- More than 7 out of 10 students were taught about the dangers of tobacco in class.
